

Augmented Reality as an Interface transforms your work productivity

Jujotech Fusion AR provides full integration of existing IIoT alerts and analytics via open API ingestion. Fusion AR can improve KPI's with instant equipment alerts and it is fully integrated with Fusion Remote for maintenance assist.

PRODUCTIVITY FEATURES

- Realtime hands-free on-the-spot training
- 30-50% reduction in machine downtime
- Actionable Workflow and IIoT sensor visualization
- Equipment service status and point of failure information
- Hands-free complex assembly
- Fully integrated with Fusion Remote for expert support

KEY FEATURES

Just-in-Time Actionable IIoT	Live equipment status	Instant equipment alerts	QA management integration
------------------------------	-----------------------	--------------------------	---------------------------

Hands free Workflow fully integrated with Augmented Reality and Remote Assist

WorkLogic is an open API digital work instructions and checklist for Industrial and Enterprise smart headsets, tablets, or smart phones. Fully interoperable with Fusion AR and Fusion Remote. Your connected worker can access handsfree “Actionable” step-by-step instructions or digital forms that include full data capture.

PRODUCTIVITY FEATURES

- Step by Step Instructions
- Digital sign on/off procedures
- Compatible with existing workflow processes
- Troubleshooting decision trees
- Fully integrated with Fusion AR and Fusion Remote
- Real Time Training
- Inspection and Maintenance Assist
- Knowledge base creation

KEY FEATURES

End-to-end process management by tasks	Hands free control for optimal workflow or checklist execution	Can integrate with actionable IIoT	Check list annotation	Open API
