

# Hands-free Inspections

Fusion Inspect is a step-by-step inspection solution designed for hands-free operation on smart headsets executing guidelines, checklists, with visualization capability using Augmented Reality Overlays.

## USE CASES

- Field Equipment Inspection
- Quality Assurance Inspections
- Compliance
- EHS (Environment Health and Safety)
- AEC (Architecture Engineering and Construction)
- Training
- Applicable in almost all industries such as Oil and Gas, Automotive, Manufacturing, Transportation, Communications, and Healthcare.

## KEY FEATURES

- Step-by-Step Instructions
- Digital Sign On/Off Operations
- Checklist and Reports
- Photo and Video Capture
- Rich media Display
- Augmented Reality Overlay
- Fully integrated with Azure and AWS Databases
- Fully Secure
- Can be fully integrated with Fusion Remote and WorkLogic

# Hands-free Workflow fully integrated with Augmented Reality and Remote Assist

WorkLogic is an open API digital work instructions and checklist for Industrial and Enterprise smart headsets, tablets, or smart phones. Fully interoperable with Fusion AR and Fusion Remote. Your connected worker can access handsfree “Actionable” step-by-step instructions or digital forms that include full data capture.

## PRODUCTIVITY FEATURES

- Step by Step Instructions
- Digital sign on/off procedures
- Compatible with existing workflow processes
- Troubleshooting decision trees
- Fully integrated with Fusion AR and Fusion Remote
- Real Time Training
- Inspection and Maintenance Assist
- Knowledge base creation

## KEY FEATURES

End-to-end process management by tasks	Hands free control for optimal workflow or checklist execution	Can integrate with actionable IIoT	Check list annotation	Open API
